PRODUCT DATA SHEET

BAGBOX 50L TRANSPORT TOTE

Especially designed for Biotechnological and Pharmaceutical industries which need hygienic fluid handling production and handling systems, the BagBox 50L Transport tote is specifically crafted for secure and efficient transportation. Ideal for pharmaceuticals and biotech fluid handling applications, it effortlessly accommodates 3D sterile single-use bags. The BagBox 50L Transport tote serves as a reliable companion, ensuring the protection of sensitive biotech and pharmaceutical fluids during transit. With a compact 50 litre capacity, this non-collapsible transport tote emphasizes its efficiency in managing smaller loads, featuring unique security elements. Given its small volume, the BagBox 50L Transport tote is not designed to be collapsible, still it integrates a lockable door and a compartment above pallet level, providing secure storage for discharge tubes during transport to prevent tampering or sabotage.

Whether securely transporting pharmaceutical compounds or handling delicate biotechnological fluids, the BagBox 50L Transport tote stands out for efficiency and security in a compact and non-collapsible form. Committed to high cleanliness and precision standards, it actively contributes to the smooth and safe handling of fluids in critical industry applications, providing a solution for smaller volumes.
