PRODUCT DATA SHEET

BAGBOX 200L CLEANROOM TOTE

Engineered with precision for industries upholding the most strict hygiene standards, the BagBox 200L cleanroom tote exemplifies meticulous design. Tailored for pharmaceuticals and biotech applications, it ensures compatibility with both 2D and 3D sterile single-use bags available in the market. With a primary focus on safeguarding vulnerable biotech and pharmaceutical fluids, the BagBox 200L cleanroom tote emerges as a crucial asset for preserving sensitive fluids. Its design strategically revolves around optimizing fluid handling processes, thereby enhancing operational reliability in critical applications. Boasting an already substantial 200 litre capacity, this collapsible tote emphasizes benefits suited for managing larger loads, ensuring heightened versatility and reliability.

Whether facilitating the transport of pharmaceutical compounds or overseeing the handling of delicate biotechnological materials, the BagBox 200L cleanroom tote stands out as a dedicated choice. Adhering rigorously to hygiene and precision standards, it actively contributes to the efficiency of fluid handling processes in critical industry applications, providing a robust solution for larger volumes.
