BAGBOX 200L TRANSPORT TOTE

The BagBox 200L Transport tote is crafted for secure and efficient transportation of vulnerable fluid products of Biotechnological & Pharmaceutical production processes. Ideal for pharmaceuticals and biotech fluid handling applications, it accommodates all 3D sterile single-use bags with ease. The BagBox 200L Transport tote serves as a dependable companion, ensuring the protection of sensitive biotech and pharmaceutical fluids during transit. Engineered to streamline fluid handling, it enhances reliability in critical tasks. With a practical 200 litre capacity, this collapsible transport tote emphasizes its efficiency in managing smaller loads, incorporating unique security features. Unlike its cleanroom counterpart, the BagBox 200L Transport tote features a lockable door and a compartment above pallet level, providing secure storage for discharge tubes during transport to prevent tampering or sabotage.

Whether securely transporting pharmaceutical compounds or handling delicate biotechnological fluids, the BagBox 200L Transport tote stands out for efficiency and security in a more compact volume. Committed to high cleanliness and precision standards, it actively contributes to the smooth and safe handling of fluids in critical industry applications, providing an unmatched solution for smaller volumes of fluids.
